

Risikovurdering af sikkerhedsdatablad og arbejdsprocedurer

Hvordan kan jeg bruge SDS Manager til at dokumentere arbejdsprocedurer for farlige kemikalier?

I SDS Manager kan du [oprette arbejdsprocedure](#) i henhold til REACH, OSHA og COSHH.

En arbejdsprocedure bruges typisk til at beskrive en arbejdsprocedure, der involverer kemikalier, men det er også muligt at oprette arbejdsprocedurer, der ikke inkluderer kemikalier, kun ved at bruge ikke-substansrelaterede farer, f.eks. elektriske farer.

En arbejdsprocedure har følgende GENERELLE oplysninger: Hyppighed af arbejdsproceduren, beskrivelse af proceduren, beskrivelse af arbejdssteps og beskrivelse af farerne

Job procedure: Priming epoxy floor

Frequency of job procedure: Daily

Når du knytter brugere til en arbejdsprocedure, vil brugeren modtage en e-mail, der beder brugeren om at gennemgå arbejdsproceduren og klikke på "Bekræft, at jeg har læst" proceduren. Dette hjælper dig med at dokumentere, at procedurerne er blevet læst af de involverede brugere.

Hi Erlend Bruvik,

You have been added to Job procedure Priming epoxy floor.

Please visit [SdsManager - Inventory Management](#), read the job procedure thoroughly, and press the "Confirmed read" button on the Job procedure once you have read it.

Kind regards,

Arbejdsproceduren kan knyttes til et eller flere risikovurderede kemikalier (sikkerhedsdatablade). Kun risikovurderede sikkerhedsdatablader kan knyttes til arbejdsproceduren. Det vil sige, at du opretter en arbejdsprocedure, der involverer f.eks. 2 kemikalier, du opretter først kemikalierisikovurdering for hvert af de to sikkerhedsdatablader og knytter derefter de risikovurderede kemikalier til arbejdsproceduren.

Risikovurdering af sikkerhedsdatablad og arbejdsprocedurer

Product Name	Supplier	Revision date	Amount	Substance hazard
5401 EPOXY IMPREGNATION PRIMER - Base Linked risk assessment. Approved by Erlend Bruvik / 2023-03-04	Rust-Oleum Europe - Martin Mathys NV	2018-01-17	1 l	   
540101 EPOXY IMPREGNATION PRIMER - Activator Linked risk assessment. Approved by Erlend Bruvik / 2023-03-04	Tor Coatings Limited	2022-02-09	200 l	   

Risikovurderingen af arbejdsproceduren beregnes som den højeste vurdering fundet i de knyttede kemikalierisikovurderinger.

Ikke-substansrelaterede sikkerhedsfare kan også tilføjes til arbejdsproceduren.

Processes

Select process or lead and lead compounds where workers are or may be exposed to substances, substance mixtures or processes from the list below.

Substance

På arbejdsprocedure-risikovurderingen vil risiciene blive opført for brug uden PPE og kontrol samt risiciene med kontrol.

SDS Manager bruger en risikoklassificering, der spænder fra 1-5 for (S)undhed, (S)ikkerhed og (M)iljø, hvor 3 er den højeste acceptable risiko for medarbejdere

I nedenstående eksempel kan vi se, at alle sundhedsrisici er middelhøje (H3), mens sikkerhedsrisikoen er meget lav (S1).

Risk categories	Without controls	With controls
 Eyes	H5	H3
 Inhalation/Respiration	H4	H3
 Flammable	S4	S4
 Environmental	E3	E1

Risikovurdering af sikkerhedsdatablad og arbejdsprocedurer

De kontroller, der er identificeret i arbejdsproceduren, vises på eventuelle sekundære containeretiketter, der er tilgængelige for alle brugere af SDS Inventory Manager.

Controls in place	
Symbol	Comment
	Wear cotton suit
	Wear protective glasses
	Do not eat during work procedure
	No open flame
	Rinse with lots of water for at least 10 minutes if substance is in contact with the skin
	Call firedepartment in case of accident

Arbejdsprocedurer kan godkendes og revideres.

Nedenfor er et eksempel på en arbejdsfareranalyse oprettet i SDS Manager:

Description of procedure

Monthly cleaning of 3D printer and refill Argon.

Description of Job steps

The first thing you should do is remove the vat from the 3D printer and then drain the leftover resin into the plastic bottles you have.

Use the funnel and filter to make this process easier. You can reuse the resin after you have finished cleaning the vat.

Description of Hazards

Refrigerated Argon is very dangerous to get on the skin. Fumes from the Resin must not be inhaled.

Description of Controls

Use described PPE

Confirm I have read the job procedure

Risk categories	Without controls	With controls
Eyes	H3	H3
Skin	H4	H3
Inhalation/Respiration	H3	H3
Corrosive	H3	H3
Flammable	S1	S1
Pressurized	S2	S2
Environment	E1	E1

PPE and Controls

Substance: LIQUID RESIN CLEANER

Open SDS

How should the substance be used?

Clean accordint to descriptin on 3D printer operation manual.

What is the substance used for?

Clean 3D printer

Storage requirements

keep locked

How should the substance be disposed of?

Dispose of all waste product and wastes generated from this product in accordance with local, state, and federal regulations. Assume wastes are hazardous unless characterization demonstrates otherwise. Handle empty drums as if they contain chemical residual until they have been thoroughly decontaminated.

Hazard and precautionary statements

H290: May be corrosive to metals H314: Causes severe skin burns and eye damage H335: May cause respiratory irritation

Hazards and controls

Flammable	S1 Not Dangerous Controls in place No smoking	S1 Very low
Environment	E1 Not Dangerous	E1 Very low
Corrosive	H3 Hazardous Controls in place Wear protective clothing Do Not Leave Waste	H3 Medium
Eyes	H3 Hazardous Controls in place Wear a face shield	H3 Medium
Skin	H3 Hazardous Controls in place Wear protective clothing	H3 Medium
Inhalation/Respiration	H3 Hazardous Controls in place Wear half-mask respirators	H3 Medium
