2. On this page, create your own application by selecting "**Integrate any other application you don't find in the gallery (Non-gallery)**", then enter the name of your application and click **Create**.

Why choose SDS Manager

The screenshot shows the Microsoft Azure portal interface for creating a new application. The main area displays the 'Browse Microsoft Entra Gallery' with various cloud platforms and on-premises applications. A red box and arrow labeled '1' point to the '+ Create your own application' button. The right-hand panel, titled 'Create your own application', shows the configuration steps. A red arrow and '2' point to the 'Integrate any other application you don't find in the gallery (Non-gallery)' option. At the bottom of the panel, a red arrow and '3' point to the 'Create' button.

3. For the Single Sign-On settings, choose **SAML**.

SM Name SDS Manager

Application ID 7c90373d-e370-429b-93c6- ...

Object ID 3652958a-f476-4d32-8c8d-0...

Getting Started

- 1. Assign users and groups**
Provide specific users and groups access to the applications
[Assign users and groups](#)
- 2. Set up single sign on**
Enable users to sign into their application using their Microsoft Entra credentials
[Get started](#)
- 5. Self service**
Enable users to request access to the application using their Microsoft Entra credentials
[Get started](#)

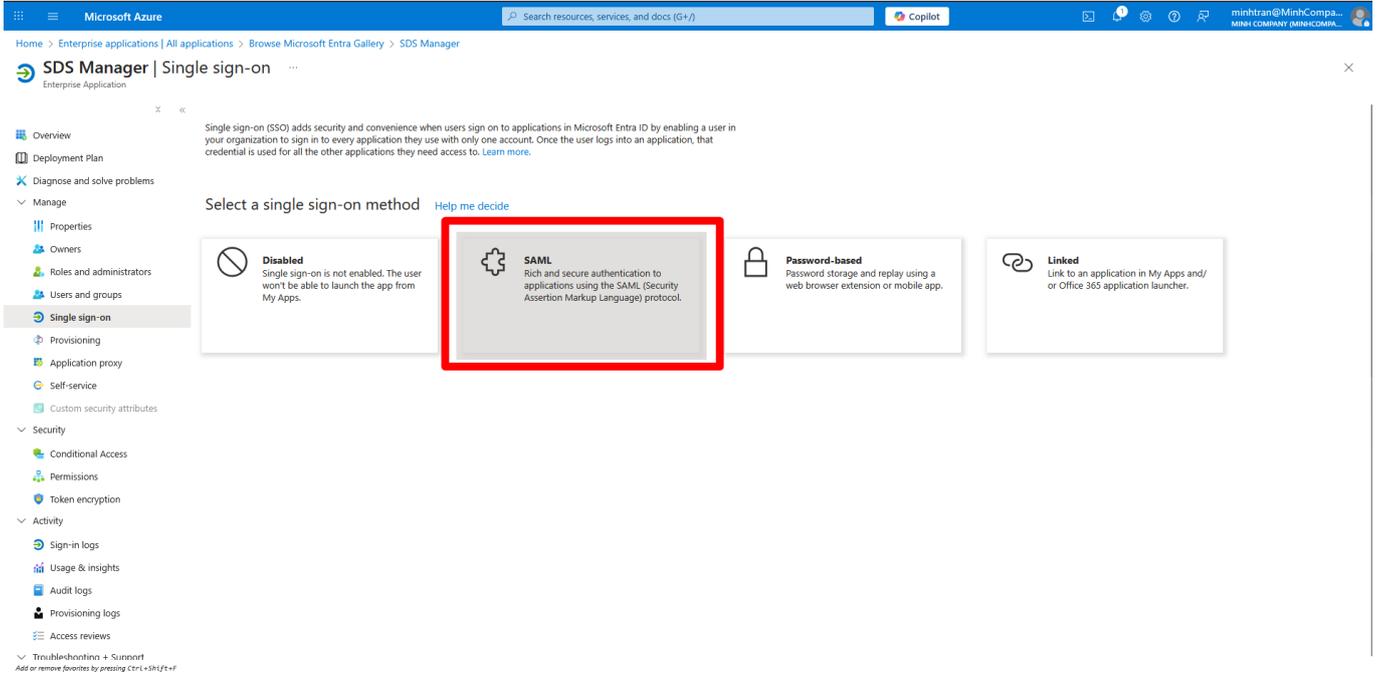

What's New

Sign in charts have moved!
The new Insights view shows sign in info along with other useful application data. [View insights](#)

Delete Application has moved to Properties
You can now delete your application from the Properties page. [View properties](#)

Why choose SDS Manager

4. Edit the Basic SAML configuration by entering:

- **Identifier (Entity ID):** https://inventory.sdsmanager.com/saml2_auth/acs/
- **Reply URL (Assertion Consumer Service URL):** https://inventory.sdsmanager.com/saml2_auth/acs/

5. Finally, please provide the SDS Manager Team with the **App Federation Metadata URL** and **Application ID**, so we can complete the setup for you.

SDS Manager | SAML-based Sign-on

Enterprise Application

Overview | Deployment Plan | Diagnose and solve problems | Manage | Properties | Owners | Roles and administrators | Users and groups | Single sign-on | Provisioning | Application proxy | Self-service | Custom security attributes | Security | Conditional Access | Permissions | Token encryption | Activity | Sign-in logs | Usage & insights | Audit logs | Provisioning logs | Access reviews | Troubleshooting + Support

Basic SAML Configuration

Identifier (Entity ID) *

The unique ID that identifies your application to Microsoft Entra ID. This value must be unique across all applications in your Microsoft Entra tenant. The default identifier will be the audience of the SAML response for IDP-initiated SSO.

https://inventory.sdsmanager.com/saml2_auth/acs/

Reply URL (Assertion Consumer Service URL) *

The reply URL is where the application expects to receive the authentication token. This is also referred to as the "Assertion Consumer Service" (ACS) in SAML.

https://inventory.sdsmanager.com/saml2_auth/acs/

Sign on URL (Optional)

Sign on URL is used if you would like to perform service provider-initiated single sign-on. This value is the sign-in page URL for your application. This field is unnecessary if you want to perform identity provider-initiated single sign-on.

Enter a sign on URL

Relay State (Optional)

The Relay State instructs the application where to redirect users after authentication is completed, and the value is typically a URL or URL path that takes users to a specific location within the application.

Enter a relay state

Logout URL (Optional)

This URL is used to send the SAML logout response back to the application.

Enter a logout url

Attributes & Claims

givenname user.givenname
surname user.surname
emailaddress name
name Unique User Identifier
user.userprincipalname

Basic SAML Configuration

Save | Got feedback?

Identifier (Entity ID) *

The unique ID that identifies your application to Microsoft Entra ID. This value must be unique across all applications in your Microsoft Entra tenant. The default identifier will be the audience of the SAML response for IDP-initiated SSO.

[https://inventory.sdsmanager.com/saml2_auth/acs/](#)

Reply URL (Assertion Consumer Service URL) *

The reply URL is where the application expects to receive the authentication token. This is also referred to as the "Assertion Consumer Service" (ACS) in SAML.

[https://inventory.sdsmanager.com/saml2_auth/acs/](#)

Sign on URL (Optional)

Sign on URL is used if you would like to perform service provider-initiated single sign-on. This value is the sign-in page URL for your application. This field is unnecessary if you want to perform identity provider-initiated single sign-on.

Relay State (Optional)

The Relay State instructs the application where to redirect users after authentication is completed, and the value is typically a URL or URL path that takes users to a specific location within the application.

Logout URL (Optional)

This URL is used to send the SAML logout response back to the application.

Then you can access it via <https://myapps.microsoft.com>.
