

Why choose SDS Manager

How to set up Single Sign-On (SSO) with Okta for SDS Manager

Overview

This guide creates a **SAML 2.0** app integration in **Okta** and connects it to **SDS Manager - Inventory**.

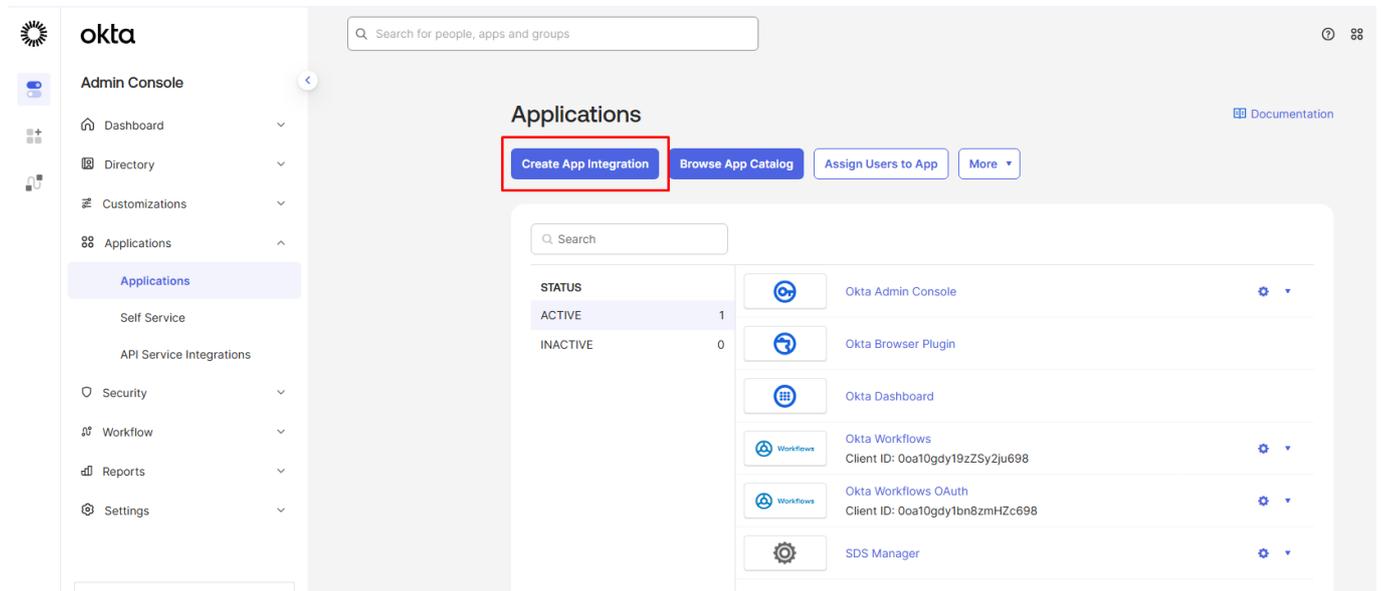

Prerequisites

- You have **Okta** Admin access.
- You have **SDS Manager** admin access to configure SSO in SDS Manager.

A) Configure Okta (Identity Provider)

1) Create a new SAML app integration

1. In **Okta Admin Console** go to **Applications** → **Applications** → **Create App Integration**.
2. Choose **SAML 2.0**.

Why choose SDS Manager

Create a new app integration

Sign-in method

[Learn More](#)

- OIDC - OpenID Connect**
Token-based OAuth 2.0 authentication for Single Sign-On (SSO) through API endpoints. Recommended if you intend to build a custom app integration with the Okta Sign-In Widget.
- SAML 2.0**
XML-based open standard for SSO. Use if the Identity Provider for your application only supports SAML.
- SWA - Secure Web Authentication**
Okta-specific SSO method. Use if your application doesn't support OIDC or SAML.
- API Services**
Interact with Okta APIs using the scoped OAuth 2.0 access tokens for machine-to-machine authentication.

[Cancel](#) [Next](#)

2) General Settings

1. Enter an **App name** (optionally upload a logo).
2. Click **Next**.

Create SAML Integration

1 General Settings 2 Configure SAML 3 Feedback

1 General Settings

Enter the application name here (e.g. SDS Manager)

App name

App logo (optional)  

App visibility Do not display application icon to users

[Cancel](#) [Next](#)

3) Configure SAML (initial pass)

- **Single sign-on URL:** https://inventory.sdsmanager.com/saml2_auth/acs/
- **Audience URI (SP Entity ID):** temporary value (you will update this after Okta generates the App ID)

Why choose SDS Manager

- **Default RelayState:** <http://inventory.sdsmanager.com/sso-login/>
- **Name ID format:** EmailAddress
- **Application username:** Email (usually)

Click **Next**.

Edit SAML Integration

- 1 General Settings
- 2 Configure SAML
- 3 Feedback

A SAML Settings

1 We found some errors. Please review the form and make corrections.

General

Single sign-on URL ?
 Use this for Recipient URL and Destination URL

Audience URI (SP Entity ID) ?

Default RelayState ?
If no value is set, a blank RelayState is sent

Name ID format ?

Application username ?

Update application username on

What does this form do?

This form generates the XML needed for the app's SAML request.

Where do I find the info this form needs?

The app you're trying to integrate with should have its own documentation on using SAML. You'll need to find that doc, and it should outline what information you need to specify in this form.

4) Feedback

- Select **This is an internal app that we have created.**
- Click **Finish.**

Why choose SDS Manager

Edit SAML Integration

1 General Settings 2 Configure SAML 3 Feedback

3 Help Okta Support understand how you configured this application

The optional questions below assist Okta Support in understanding your app integration.

App type This is an internal app that we have created

Previous Finish

Why are you asking me this?
This form provides Okta Support with useful background information about your app. Thank you for your help—we appreciate it.

B) Get the Okta App ID and update the Audience URI

5) Copy the Okta App ID from Metadata URL

1. Open the new app in Okta.
2. Go to **Sign On** and find **Metadata URL** (or “View SAML setup instructions”).
3. Copy the ID between /app/ and /sso/.

Example Metadata URL:

- <https://app/exk10gdvzhvZbcyl2698/sso/saml/metadata>
- App ID = exk10gdvzhvZbcyl2698

Why choose SDS Manager

The screenshot shows the SDS Manager web interface. At the top, there is a gear icon, the text 'SDS Manager', and a status 'Active' with a dropdown arrow. To the right are links for 'View Logs' and 'Monitor Imports'. Below this is a navigation bar with tabs for 'General', 'Sign On', 'Import', and 'Assignments'. The 'Sign On' tab is selected. The main content area is titled 'Settings' and has an 'Edit' link. Under 'Sign on methods', there is a description of sign-on methods and a link to 'Configure profile mapping'. The 'SAML 2.0' method is selected. A table shows 'Default Relay State' as 'http://inventory.sdsmanager.com/sso-login/'. Under 'Metadata details', the 'Metadata URL' is 'https://trial-1543710.okta.com/app/exk10gdvzhvZbcyl2698/sso/saml/metadata', which is highlighted with a red box and has a 'Copy' button below it. A 'More details' link is at the bottom left of the settings panel. On the right side, there is an 'About' section explaining SAML 2.0, an 'Application Username' section with instructions, and a 'SAML Setup' section.

6) Update Audience URI (SP Entity ID)

1. Go to **General** → **SAML Settings** → **Edit** (or **Sign On** → **Edit SAML settings**).
2. Continue to **Configure SAML**.
3. Set:

- **Audience URI (SP Entity ID):** spn:

Example:

- spn:exk10gdvzhvZbcyl2698

Save.

What does this form do?
This form generates the XML needed for the app's SAML request.

Where do I find the info this form needs?
The app you're trying to integrate with should have its own documentation on using SAML. You'll need to find that doc, and it should outline what information you need to specify in this form.

C) Add attribute statements (required)

In the app's SAML settings, add these **Attribute Statements**:

- **emailAddress** = user.profile.email

Save.

Attribute statements
