Why choose SDS Manager

What is unique with SDS Manager?

There are many tools for keeping a library of Safety Data Sheets (SDSs). This is what makes SDS Manager different:

- **All in one.** SDS Manager is an all-in-one SDS management tool: your SDS library, SDS updates, labels, restricted-list checks, risk assessments and employee access by QR code, in one place.
- **One of the world's largest SDS databases.** Our database has 30 million+ SDSs from more than 200,000 suppliers, in more than 40 languages.
- **Transparent pricing.** You only pay for the number of SDSs in your library. There are no additional fees for admin users or extra locations, and there is no lock-in period: you can stop at any time. Many other SDS management tools price by the size of the company, for example by the number of locations or employees. See the pricing page.
- **All the data in your SDSs.** SDS Manager extracts the data from your SDS files into a structured format, not just a few key fields. You can search it, compare SDSs and export the data to Excel.
- **Easy to move to SDS Manager.** Our migration tools import your SDS binders, PDF files and product lists quickly, and we import your existing SDS files at no extra cost. Read more: How do I migrate/import our current file-based SDS library to SDS Manager? · Can SDS Manager staff do the migration of our SDS library for us?
