

Why choose SDS Manager

See SDS Manager in daily use - from employee perspective

Access the SDS library

With SDS Manager, you can get easy access to your SDS library and all safety information by simply scanning a QR code poster.

Many of our customers also use tablets where SDS Manager is installed. We can help installing Kiosk software on the tables to only allow the tablet to be used for access to Safety Data Sheets, and automatically open your SDS library when powered on.

SDS Manager is specialized to be used on mobile phones

Since we extract all information from the PDF files in a structured format, information is available in a readable format that also works well on mobile phones.

Why choose SDS Manager

The image to the left is the SDS list which read-only users will see and to the right is a detailed view of one SDS.

The screenshot displays the 'SDS Library for Owner X' interface. At the top, there is a search bar with the placeholder text 'Filter by Product name, Supplier, CAS# or UFI' and a magnifying glass icon. Below the search bar is a 'Filter' button with a funnel icon. A row of tabs is visible: 'General' (selected), 'Hazard', 'Revision', 'Risk', and 'Custom Fields'. The main content area shows three SDS entries:

- Entry 1:** '<=0.1% HCL/Air'. Supplier: Calgaz Ltd. Department: Department Z. Quantity: 100000 (qt). Hazard level: Warning. Risk codes: H1, S4, E1. Icons: Corrosive, Harmful.
- Entry 2:** '= 0.1 mol/l (0.1 N) Titrisol'. Supplier: Sigma-Aldrich Pte Ltd. Department: SUS Department. Quantity: 4535.929094 (kg). Hazard level: Danger. Risk codes: H3, S5, E5. Icons: Health Hazard, Environment, GHS07, GHS09, GHS05, GHS07.
- Entry 3:** '<=0.1 % NO2 <=0.1 % CO//N2'. Supplier: Calgaz Ltd. Department: SUS Department.

Each entry includes a row of action icons: PDF, Share, Tag, Edit, Link, Add, Remove, and a menu icon.

Why choose SDS Manager

Easy for employees to find Safety Data Sheets in your SDS library

To find SDS for a product in your SDS library, simply enter a few keywords from the product name, supplier name or product code.

The screenshot displays the 'SDS Library for Owner X' interface. At the top, a search bar contains the text 'accu' with a magnifying glass icon and a close button. Below the search bar is a 'Filter' button with a funnel icon. A row of tabs includes 'General' (highlighted in blue), 'Hazard', 'Revision', 'Risk', and 'Custom Fields'. Two search results are shown:

- 1,2-Dichlorobenzene**: The supplier 'AccuStandard, Inc' is highlighted with a red box. The hazard classification is 'Hazardous Area 100 (kg)'. The warning labels are H4 (yellow), S1 (green), and E1 (green). Below the labels are icons for GHS hazard and PPE, and a row of action icons including PDF, print, share, edit, and add.
- Benzene**: The supplier 'AccuStandard, Inc' is highlighted with a red box. The hazard classification is 'Hazardous Area'. The warning labels are H5 (red), S3 (yellow), and E1 (green). Below the labels are icons for GHS hazard, and a row of action icons including PDF, print, share, edit, and add.

When no SDS is found in your library using the search keywords, SDS Manager will automatically search its global database of over 14 million safety data sheets. This serves as a valuable fallback, allowing your employees to likely find SDS for products that haven't yet been added to your library. This feature not only helps ensure continuous access to critical safety data but also significantly improves your chances of passing regulatory inspections by ensuring all required SDS are available.

Request Safety Data Sheet to be added to company library

Any employee can request that a missing SDS be added to your library. When an SDS request is made, the SDS library administrator will receive an email notification, ensuring the request is promptly addressed.

Access to Hazard information

On the Hazard tab, only H and P codes are showing in the SDS list. Click on the SDS in the list to see a panel with details of the codes.

Access to detailed information from the Safety Data Sheets

For users that need access to more detailed information from the Safety Data Sheets, they can configure what data from the SDS to be shown.

Below is an example where a user has configured the system to show the Boiling point on all products.

Why choose SDS Manager

Why choose SDS Manager

Users have access to the original Safety Data Sheet file by clicking on the "PDF" icon. As shown below, the PDF version is much less readable on a mobile phone than the extracted view of the data that SDS Manager present to the users.

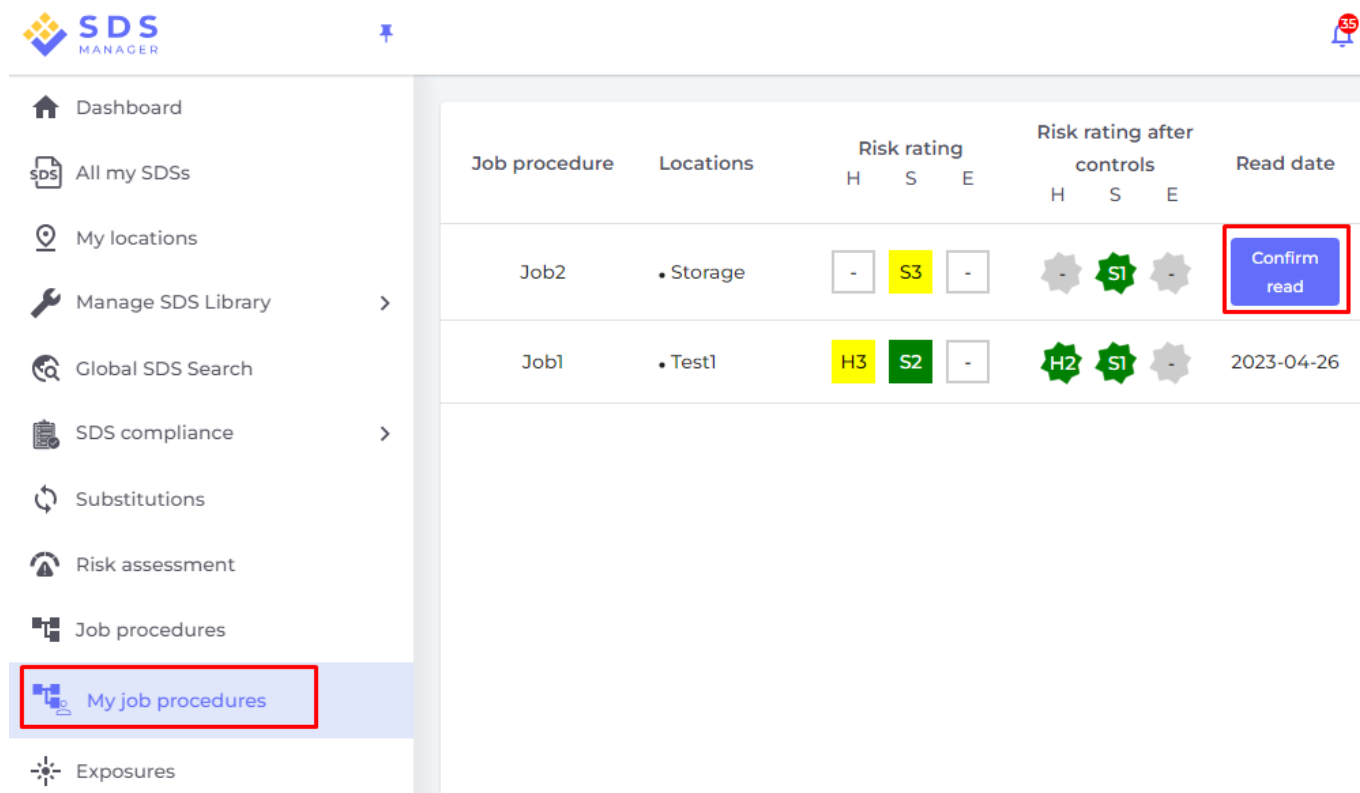

Why choose SDS Manager

Why choose SDS Manager

SDS Risk assessment and Job procedures

If you are using SDS Manager to create risk assessment and Job hazard analysis, employees can get easy access to required PPEs and QR codes to read detailed instructions.

When users are assigned to a job procedure, you can require them to register a read-receipt (Confirm read). The read-receipt will be the documentation that the users have read the procedures and are informed about PPE and controls.

The screenshot shows the SDS Manager interface. On the left is a navigation menu with items: Dashboard, All my SDSs, My locations, Manage SDS Library, Global SDS Search, SDS compliance, Substitutions, Risk assessment, Job procedures, My job procedures (highlighted with a red box), and Exposures. The main content area displays a table with the following data:

| Job procedure | Locations | Risk rating | | | Risk rating after controls | | | Read date |
|---------------|-----------|-------------|----|---|----------------------------|----|---|---|
| | | H | S | E | H | S | E | |
| Job2 | • Storage | - | S3 | - | - | S1 | - | Confirm read (highlighted with a red box) |
| Job1 | • Test1 | H3 | S2 | - | H2 | S1 | - | 2023-04-26 |

Below are examples of a dummy **Chemical instruction & risk assessment** and a dummy **Job procedure** (COSHH compliant Job hazard analysis)

Why choose SDS Manager

Why choose SDS Manager

Why choose SDS Manager

Seeing is believing!

Please click on the below picture or scan the below QR code with your cell phone and see what your employees will see when they access your next SDS library.

Why choose SDS Manager

SDS Manager APP for iOS and Android for offline access to Safety Data Sheets.

The SDS Manager Mobile App provides offline access to your Safety Data Sheets (SDS)

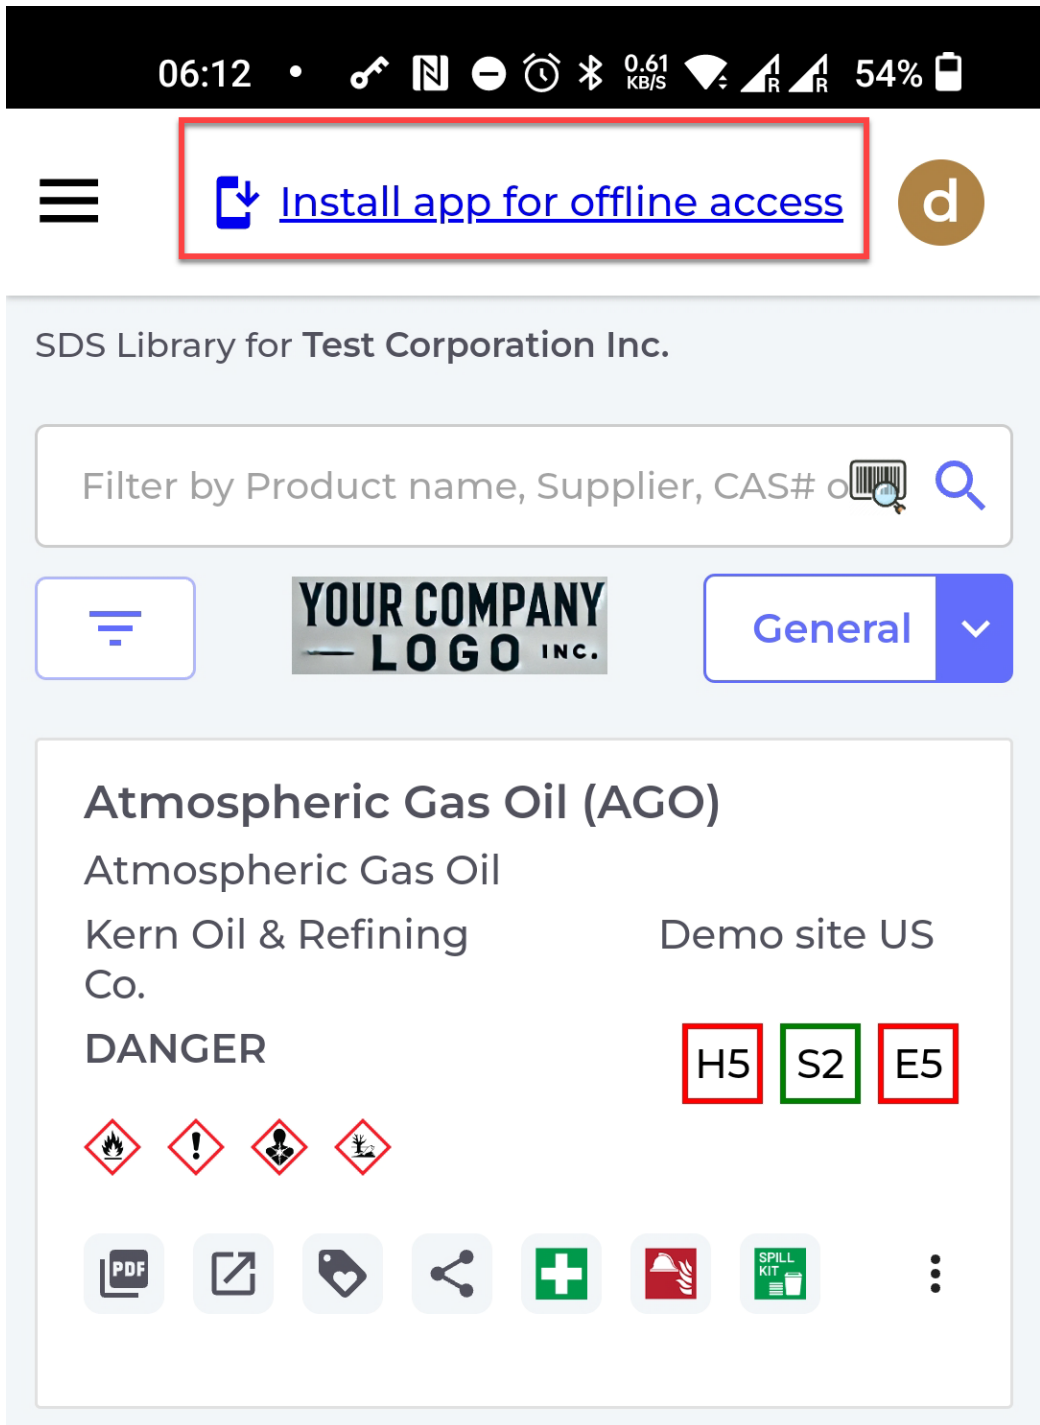

We recommend that the primary method for employee access Safety Data Sheets is by scanning QR code posters

For users that need offline access or are accessing Safety Data Sheets by scanning product barcodes, the App is very efficient.

Upon installation, the app downloads all Safety Data Sheets directly to the device, enabling access both online and offline. Additionally, users can scan product barcodes by simply opening the app and pointing it at the barcode for instant SDS retrieval.

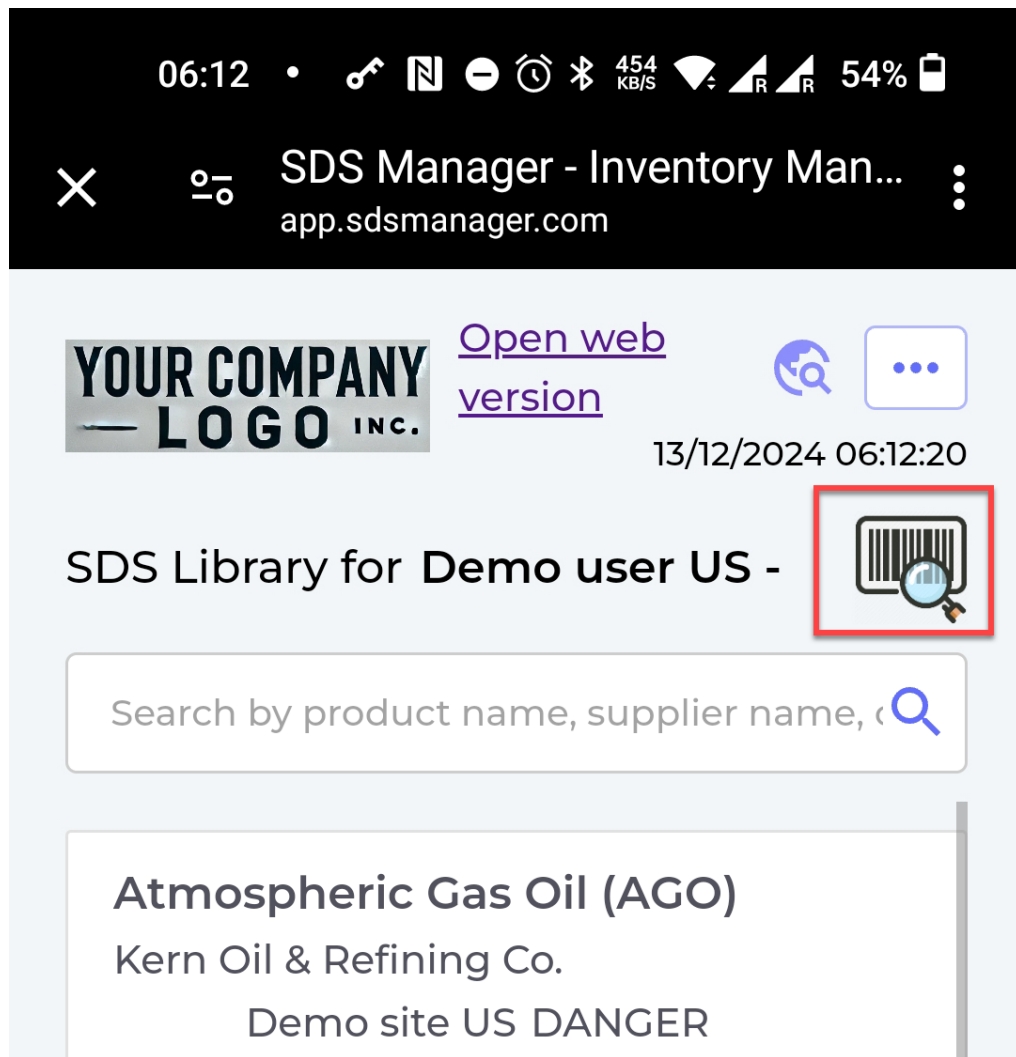

To install the app, scan the QR code poster and Click "Install app for offline access" . The app will then automatically provide access to the same SDS library available through the QR code poster.

Why choose SDS Manager

Safety information for a product is found by either searing for the product by its name or by scanning the product Barcode.

Why choose SDS Manager

To Access SDS by Barcode scanning, the Barcode numbers for the products you are musing must be linked to your SDS by your administrator.
