Why choose SDS Manager

How do I activate 2FA login

With two-factor authentication (2FA), SDS Manager e-mails you a code each time you log in. You enter the code to finish logging in. This protects your account even if someone else knows your password.

1. Click your profile picture at the top right and choose **Manage account**.
2. Under **Security**, switch on **Two Factor Authentication**.
3. The first time, the window **Verify your email** opens and we send a code to your e-mail address. Enter the code and click **Submit**. No e-mail? Click **Resend code**.

To switch 2FA off, switch off **Two Factor Authentication** and confirm with a code in the same way.

Owners, admins and Admin Light users can switch on 2FA for their own account. 2FA is part of the Pro and Enterprise plans. Read more: How can I change my account’s information and password?
