SDS Inventory Manager in use

How can I check if any of our chemicals are included in the restricted chemicals list?

Yes. SDS Manager checks the ingredients of every Safety Data Sheet (SDS) in your library against restricted chemicals lists, such as REACH, California Proposition 65 and ZDHC. It uses the CAS and EC numbers in section 3 of each SDS.

1. Click **Compliance** (**SDS compliance**) in the left menu.
2. The **Hazardous substances** page lists the SDSs that contain a substance on one of your lists.
3. To see one list only, open the **Regulation** filter and choose it.

Use the **Date Added to Restricted List** filter to see the substances that were added to a list recently. Click **Export to XLSX** to get the list as an Excel file.
