## How can I export our SDS library to a Excel/xlsx/csv file?

Under the "Reports" menu (Require PRO version to access), you can find an option to export all your SDS to a csv file.

On the [All Our SDS](#) page you can export a selection of SDS to Excel file. In the below example we export all SDS that are flammable or explosive (GHS01 or GHS02 pictogram) with recorded stored amount of more than 100 gallons that can be useful for EPA reporting.

The screenshot shows the 'All Our SDS' interface with the following filters and data:

- Search for SDS:** Search for SDS, Filter by CAS# in components, All Locations
- Filters:** Only list SDS in use, Approval Status: All, Supplier, Revision date, Risk assessment: All, Hazard statements
- GHS pictograms:** GHS02
- Custom Fields:** Presence of Product, All, Updated By, Bulk Action
- External System Id Presence:** All, Amount stored more than 100 (gals)

Product Name	Supplier Name	Product Code	Revision date	GHS	Substance hazard H S E	Last evaluated	Locations	Approval Status	
<input type="checkbox"/> Pentane Blend 85/15	Shell Chemicals Europe B.V	Q1128	2022-03-28		H3 S4 E4	Risk must be evaluated	<a href="#">View locations</a>	No approval info	<a href="#">Replace with new SDS</a> <a href="#">Add to Location</a>
<input type="checkbox"/> Petrol K4	PANTA DISTRIBUZIONE S.p.A		2012-11-30		H5 S4 E4	Risk must be evaluated	<a href="#">View locations</a>	No approval info	<a href="#">Replace with new SDS</a> <a href="#">Add to Location</a>

Rows per page: 10, 1-2 of 2, < >

See below of an example file of what data is available in the export file. (Other data can be added to the export file on request).
