Miscellaneous

How can I export our SDS library to a Excel/xlsx/csv file?

SDS Manager offer several options for export of your SDS library (require PRO plan or higher)

1 - Standard export of SDS library

Under the "Reports" menu (Require PRO version to access), you can find an option to export all your SDS to a csv file.

2. Custom export of SDS library

From any <u>location</u> you can export all SDSs linked to the location . If you check the option "Include sub-locations" all SDS on the sublocations will also be included in the export.

Miscellaneous

See below of an example file of what data is available in the export file. (Other data can be added to the export file on request). Page $2\ /\ 3$
