User management and access controll

Can I let our employees access SDS library from our intranet?

Yes. Every QR code poster in SDS Manager has a link, and you can put that link on your intranet. Employees who click it open your SDS library with read-only access, the same as when they scan the QR code. They don't need a user account or a password.

To copy the link, click **QR Access** (**Employee Access**) in the left menu, click ⋮ on the QR code and choose **URL for intranet access**. The link gives the same access as the QR code: all SDSs, or only the locations you chose for it.
