How can I see all the details about an SDS?

Each Safety Data Sheet (SDS) in your library has a details page with the information SDS Manager has read from it.

Open the details

Click the SDS in **Manage SDS Library**, **All my SDSs** or **SDS Filter**, or click the eye icon (**View details**) on its row.

What is on the details page

- At the top: the product, the supplier, the signal word, pictograms and PPE symbols, and the risk ratings. Buttons open the PDF and the change log, and **Show locations product is used** lists where you use the product.
- Your own information message and attachments, if you have added them.
- **General Information**: product name, synonyms, product code, CAS number and the revision, print and issue dates.
- **Company Information**, **GHS Information**, **Hazard statements**, **Precautionary statements** and **EUH-statements**.
- The sections of the SDS, one by one.

Tick **Compare with PDF** to see the PDF next to the details.

If a newer version of the SDS exists, a message at the top says so. Click it to move to the new version.
