Daily use

How can I share a link to a SDS?

You can share a link to a Safety Data Sheet (SDS), for example in an e-mail or a chat message. The person who gets it can open the SDS without logging in.

1. Open the location in **Manage SDS Library** (or **All my SDSs**) and find the SDS.
2. Click the share icon (**Share PDF**) on its row. The link is copied, and you see **URL for PDF view is copied to clipboard**.
3. Paste the link where you need it.

The link opens the SDS on sdsmanager.com. If you see **This SDS does not have a shareable link**, the SDS cannot be shared this way.

To give your employees access to all your SDSs, use a QR code poster instead: How can our employees access our SDS library By scanning QR Code poster?
