How can I inform our employees about required PPE and controls?

Each SDS will provide you with information on required PPE and controls. SDS Manager can help you extract this information and categorize them.

From the "All my SDSs" or "Manage SDS Library" page, this information is listed in the "Pictograms & Control" column.

The screenshot displays the 'SDS Library for Test Corporation Inc.' interface. At the top, there is a search bar and a notification banner. Below the search bar, a filter dropdown is set to 'General'. A table lists two substances: 'Accurate S10 Fuel Marker (Dow)' and 'Barium nitrate'. The 'Pictograms & Controls' column for each substance is highlighted with a red box, showing a grid of hazard pictograms (flame, explosion, gas cylinder, etc.) and control pictograms (gloves, goggles, etc.). To the right of the pictograms, the 'Substance hazard' column shows H4, S1, and E4 for the first substance, and H4, S4, and E1 for the second. The 'Actions' column contains icons for document, print, and other actions.

Product Name ↑	Supplier Name	Signal word	Amount	Pictograms & Controls	Substance hazard	Actions
					H S E	
Accurate S10 Fuel Marker (Dow)	Innospec Limited	Danger	50 (l)		H4 S1 E4	
Barium nitrate	Sigma-Aldrich Inc	Danger	10 (l)		H4 S4 E1	

If your company requires extra required PPE and controls, you can set up a Risk evaluation for a product/substance.

Open "All my SDSs" or "Manage SDS Library" page and find the substance.

Click on the "More Actions" icon from the "Actions" column and choose "Create risk evaluation".
