How can I compare the content of the SDS of two chemicals?

SDS Manager allow you to compare two Safety Data Sheets side-by-side.

On our [All Our SDS](#) page (require login), you can select two SDS and select "Show differences between two SDS" from Bulk Action.

The screenshot shows the 'All Our SDS' interface. At the top, there is a search bar and filters for 'Filter by CAS# in components' and 'All Locations'. Below this are dropdown menus for 'SDS status', 'Approval Status', 'Supplier', 'Revision date', 'Risk assessment', and 'Hazard statements'. A 'Bulk Action' dropdown menu is open, showing options: 'Move SDS to another location', 'Copy SDS to another location', 'Move to archive', 'Show differences between the two SDS' (highlighted with a red box), 'Set custom field', and 'Set SDS to approved'. The main table lists products with columns for checkboxes, Product Name, Supplier Name, Product Code, Revision date, GHS, Substance hazard (H, S, E), Last evaluated, Locations, and a 'Bulk Action' column. The first row is 'A-100 Exterior Acrylic Latex Flat MOCS Anti-Graffiti Grey' with a 'Show differences between the two SDS' button in the Bulk Action column.
