Daily use

List SDS in my library that contain hazardous substances - which regulatory restricted lists are checked?

SDS Manager reads the CAS and EC numbers of the ingredients in section 3 of each Safety Data Sheet (SDS) and checks them against regulatory lists of restricted and hazardous substances. The **SDS compliance** page lists the SDSs in your library that contain a listed substance.

See the SDSs with listed substances

Click **Compliance** (**SDS compliance**) in the left menu. The **Hazardous substances** page shows each product with the substance, its CAS or EC number, its concentration in the product and the list it is on (**Listed in**).

- Use the filters to narrow the list: **Locations**, **Regulation**, **SDS status**, **Approval Status**, **Risk assessment** and **Date Added to Restricted List**.
- Click **Export to XLSX** to get the list as an Excel file.

Choose the lists to check

Click the pencil in the **Regulation** filter, or click your profile picture at the top right and choose **Manage account**. Under **Regulatory lists to check ingredients to**, tick the lists that apply to you and click **Save**.
