

# Daily use

## How to administer notifications from SDS Manager.

On your [SDS Manager account](#), you can activate the following email notifications

- New SDS Request
- Message from SDS Manager
- Message from vendor
- New revision of an SDS
- SDS has automatically been upgraded to new version

The screenshot displays the SDS Manager web application interface. On the left is a vertical sidebar with various icons for navigation. The main content area is divided into sections: 'General Information', 'Security', and 'Email notifications'. The 'Email notifications' section is highlighted with a red border and contains five toggle switches, all of which are currently turned on. These toggles correspond to the notification types listed in the text above: 'New SDS Request', 'Message from SDS Manager', 'Message from vendor', 'New revision of an SDS', and 'SDS has automatically been upgraded to new version'. Below the toggles is a 'Save settings' button. On the right side of the interface is a user profile dropdown menu, also highlighted with a red border. It shows the user's name 'Erlend Bruvik' and company 'Test Corporation Inc.' with a 'Pro' badge. Below this, a list of menu items is visible: 'Manage account', 'Organization profile', 'User management', 'Subscription', 'Go live checklist', 'Impersonate', 'English' (with a dropdown arrow), 'Invite members', 'Import product lists', 'Settings', and 'Logout'.
