

# Daily use

## How to administer notifications from SDS Manager.

On your [SDS Manager account](#), you can activate the following email notifications

- New SDS Request
- Message from SDS Manager
- Message from vendor
- New revision of an SDS
- SDS has automatically been upgraded to new version

The screenshot displays the SDS Manager web application interface. On the left is a vertical sidebar with various icons for navigation. The main content area is divided into sections: 'General Information', 'Security', and 'Email notifications'. The 'Email notifications' section is highlighted with a red border and contains five toggle switches, all of which are turned on. These toggles correspond to the notification types listed in the text above: 'New SDS Request', 'Message from SDS Manager', 'Message from vendor', 'New revision of an SDS', and 'SDS has automatically been upgraded to new version'. Below the toggles is a 'Save settings' button. On the right side of the interface, there is a user profile dropdown menu for 'Erlend Bruvik' from 'Test Corporation Inc.', which includes options like 'Manage account', 'Organization profile', 'User management', 'Subscription', 'Go live checklist', 'Impersonate', 'English', 'Invite members', 'Import product lists', 'Settings', and 'Logout'.
