Daily use

How can i know who added or updated an SDS in our SDS library?

SDS Manager logs every change to the Safety Data Sheets (SDSs) in your library: who made it, when, and what changed.

See the changes to one SDS

Click ⋮ on the SDS and choose **View change log**, or click **View change log** on the SDS details page. The **Change log** lists each change with the user's name and e-mail, the date and time, and the old and new values.

Daily use

Find the SDSs one user has changed

Click **Filter** (**SDS Filter**) in the left menu, add a filter and choose **Updated By**. Pick the user to list the SDSs they have changed.

Owners and admins can see the change log.
