Daily use

Add information labels on SDSs - shown in the SDS list and on labels

You can add your own message to an SDS, for example "Use only in the fume hood". Choose **Info**, **Warning** or **Danger**: the message gets the matching colour. It is shown below the SDS in the SDS list, also to employees who search for it, and it can be printed on the secondary container label.

Add a message

1. Open the SDS details: click the SDS in **Manage SDS Library**, or the eye icon (**View details**) on its row.
2. Click **Add information message**.
3. Choose the **Type** (**Info**, **Warning** or **Danger**), write the **Message** and click **Save**.

URL: https://sdsmanager.com/faq/content/593/en/add-information-labels-on-sdss-_-shown-in-the-sds-list-and-on-labels

To change or remove the message, click it on the SDS details page. **Remove** deletes it.

Daily use

On the secondary container label

In the label window, switch on **Custom information message** to print the message on the label. Click the pencil next to it to write a message here: **Save to SDS** saves it on the SDS, and **Use only on this label** uses it on this label only.
