

How to keep our SDS library up-to-date

How can I edit the product name on an SDS?

In SDS Manager, you can edit the product name and any other information extracted from the Safety Data Sheet file.

To edit information, simply enter the SDS detail mode and hover on the text you want to change. See below picture on how this is done.

The screenshot displays the SDS Manager interface for a product named "1,2-Dichlorobenzene" by AccuStandard, Inc. The interface is in edit mode, indicated by a pencil icon next to the product name. A red arrow points to this pencil icon with the text "Click on the pencil to edit Product name". The product name is displayed in a blue header bar. Below the header, there are hazard icons, a "Need approval" section with an "Approve" button, and risk ratings for Health, Safety, and Environmental. The main content area is divided into sections: "General Information" and "Company Information". The "General Information" section includes fields for Product name, Product Synonyms, Chemical Formula, CAS No., Date of Issue, Icons in PDF, and Customized. The "Company Information" section includes the supplier name. A red arrow points to a pencil icon in the right-hand sidebar, with the text "Click here to open SDS detail".

You can also add a new name to a product as Synonym. The benefit of using Synonyms is that an SDS then can be found both using the original product name in the SDS and the synonym you add.
