

How to keep our SDS library up-to-date

How can I create custom fields linked to my SDSs?

SDS Manager allows you to create custom fields and assign values to them. Click on the 'Personalized view' tab, then choose the + icon

The following data types are supported: Text, numeric, Date and Enumerated

When the enumerated data type is used, a user selects a value from the dropdown list.

The Bulk action feature allows you to multi-select SDS and set custom values on all selected SDS.

How to keep our SDS library up-to-date

The screenshot shows the 'All Our SDS' page in the SDS Manager. The table lists products with columns for Product Name, Supplier Name, Product Code, Revision date, and others. A 'Bulk Action' menu is open, showing options like 'Set custom field'. A 'Set custom field' dialog box is also open, showing a dropdown for 'Require Eyewash' and a 'Yes' button selected.
