Add SDS to our new library

SDS Requests - What do I do if an SDS I need is not in the SDS Manager's database?

Our database has more than 30 million Safety Data Sheets (SDSs), but some are still missing. If you cannot find the SDS for a product, try these steps:

1. **Search Google.** Below the search results, click **Search using Google** (or **Search Google for** … when there are no results). Google opens in a new tab. If you find the SDS, download it and drag the file into SDS Manager. Read more: How to use our Google search feature to find Safety Data Sheet
2. **Save the product and ask your supplier.** If you do not find the SDS on the internet, save the product as an SDS request so you do not forget it. Then ask the company you bought it from to send you the SDS: they must give their customers the SDSs for the products they sell. You can email the supplier from SDS Manager with **Email distributor to get SDS**.
3. **Ask us.** Click **Ask SDS Manager to help** and our team looks for the SDS for you.
