

Users and QR code posters

Use enumerated custom field value to control what SDS an QR code poster is linked to

The primary function of a QR code poster (user) is to gain access to SDS linked to a Site/location.

Building A	Read Only
Building B	Read Only
Demo location	
> Factory Miami	
> Factory Paris	

SDS Manager offers an alternative method to link SDS to as QR code poster/user:

Manage Location Access

Language: English | Access setting: Customize access | **Advanced access**

Define which Safety Data Sheets this QR code will give access to. You can create multiple QR codes if you have organized your Safety Data Sheets by locations.

Select user: Demouser English

Building A | Read Only

Advanced access

Enhance the QR code feature to allow users to access SDS that match selected custom field values.

Custom fields of enumerated type: Department

Custom field value: Department South, Department East

Save

- Department North
- Department South
- Department East

In the above example, we have created an Enumerated custom field named "Department".

On the SDS Detail page, we can select the Department in which the product is used.
