

FAQ

How do I search for a specific SDS in the system?

SDS Manager has a "Free-text search throughout the entire SDS. Matches found in headings and literals are not included." search option (see screenshot) to search for specific SDS.

For example, if you search for "Alcohol resistant foam. Dry chemical powder" you will find the SDS for "Alcohol resistant foam. Dry chemical powder" and "Alcohol resistant foam. Dry chemical powder".

For more information on how to use the search function, please refer to the user manual or contact your account manager.
