How to print HMIS labels for products in the system. To print labels, click on the "Print HMIS Label" option in the dropdown menu. [View the full article.](#) "Print HMIS Label" is the option to print labels.

The screenshot displays a table of chemical products with a context menu open over the third row. The table columns include product name, hazard level, quantity, and hazard pictograms. The dropdown menu contains the following options:

- Move SDS
- Log presence of product
- Move amount to other location
- Open risk evaluation
- Open chemical instruction
- Move to archive
- Hide from Non-admin
- Safety information summary
- Print HMIS label** (highlighted with a red box)
- Replace with new SDS
- Edit SDS information
- Add UPC code
- Add attachment
- Mark product as discontinued
