QR codes give users of chemicals access to Safety Data Sheets by scanning QR codes with their mobile device or via link from your corporate intranet.

Users that scan the QR code will get read-only access to your SDS library. Safety Data Sheets are then found by searching using part of the product name and/or supplier name.

You can create multiple "QR code users" – e.g., one for each of your locations, or a single "QR code user" that gives access to all the SDSs your organization has in the SDS library.

Click the QR poster below to [print QR poster](#), [get URL to add to your corporate intranet](#) or [see a suggested go-live email](#) you can send to your organization.
