

Gebruikers en QR-code posters

Gebruik een genummerde aangepaste veldwaarde om te bepalen aan welk veiligheidsinformatieblad een QR-codeposter is gekoppeld.

De primaire functie van een QR-codeposter (gebruiker) is om toegang te krijgen tot veiligheidsinformatiebladen die zijn gekoppeld aan een locatie.

Building A	Read Only
Building B	Read Only
Demo location	
> Factory Miami	
> Factory Paris	

SDS Manager biedt een alternatieve methode om veiligheidsinformatiebladen te koppelen aan een QR-codeposter/gebruiker:

The screenshot shows the 'Manage Location Access' interface in SDS Manager. The 'Advanced access' dialog box is open, allowing users to define which Safety Data Sheets (SDS) a QR code will give access to based on custom field values. The dialog box has a title bar 'Advanced access' and a close button 'X'. The main text says: 'Enhance the QR code feature to allow users to access SDS that match selected custom field values.' There are two main sections: 'Custom fields of enumerated type' and 'Custom field value'. The 'Custom fields of enumerated type' section has a dropdown menu with 'Department' selected. The 'Custom field value' section has a dropdown menu with 'Department South, Department East' selected. Below this, there is a list of departments with checkboxes: 'Department North' (unchecked), 'Department South' (checked), and 'Department East' (checked). A 'Save' button and a help icon (?) are also visible.

Manage Location Access

Language: English Access setting: Customize access **Advanced access**

Define which Safety Data Sheets this QR code will give access to. You can create multiple QR codes if you have organized your Safety Data Sheets by locations.

Select user: Demouser English

Building A Read Only

Advanced access

Enhance the QR code feature to allow users to access SDS that match selected custom field values.

Custom fields of enumerated type: Department Custom field value: Department South, Department East

Save ?

Custom fields of enumerated type

Department North (unchecked)

Department South (checked)

Department East (checked)

Gebruikers en QR-code posters

In het bovenstaande voorbeeld hebben we een genummerd aangepast veld aangemaakt met de naam "Afdeling".

Op de detailpagina van het veiligheidsinformatieblad kunnen we de afdeling selecteren waarin het product wordt gebruikt.
